RESTRICTION

1. Applicant's amendment filed on 6/15/01 has been entered. Claims 1-11 have been canceled. Claims 12-30 have been entered, Claims 12-30 are pending in the application.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 12, 13 and 18-21 drawn to polypeptide, vaccine and a method of screening potential drugs.

Further restriction to one SEQ.ID.NO or one peptide represented by "pho", a lab designated identifier required (see paragraph # 3).

Group II, claims 14-17 drawn to DNA, vector and host cell.

Further restriction to one SEQ.ID.NO or one peptide represented by "pho", a lab designated identifier required (see paragraph # 3).

Group III, claims 29-30 drawn to an antibody and a therapeutic composition.

Further restriction to one SEQ.ID.NO or one peptide represented by "pho", a lab designated identifier required (see paragraph # 3).

Group IV, claims 22- 23 drawn to a method for the detection of virulence using peptide

Further restriction to one SEQ.ID.NO or one peptide represented by "pho", a lab designated identifier required (see paragraph # 3).

Group V, claims 24-28 drawn to a method for the treatment or prevention of a condition with bacterial streptococcal infection.

Further restriction to one SEQ.ID.NO or one peptide represented by "pho", a lab designated identifier required (see paragraph # 3).

Art Unit: 1645

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a polypeptide and a method of use. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products such as nucleic acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature. Group I that is drawn to amino acid is the first product and product of use. The Group IV-V inventions are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-V claims, and the special technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking.

DISTINCT INVENTIONS

3. For each group of inventions I-V above, restriction to one of the following peptide which is represented by either lab designated identifier pho1-13, pho3-21, pho2-15, pho3-18, pho3-33, pho3-3 pho3-17, pho2-2, pho1-5, pho3-1, pho3-23, pho3-50, pho1-14, pho2-10, pho3-14, pho3-24, pho3-29 or SEQ.ID.NO is also required under 35 U.S.C. 121 and 372. Therefore, election is required of one of inventions I - V and one of peptide represented by either a lab designated identifier "pho" or SEQ ID NO: 2, 4, 6, 8, 10, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33 and 35.

Inventions pho1-13, pho3-21, pho2-15, pho3-18, pho3-33, pho3-3 pho3-17, pho2-2, pho1-5, pho3-1, pho3-23, pho3-50, pho1-14, pho2-10, pho3-14, pho3-24, pho3-29 or SEQ ID NO: 2, 4,

Art Unit: 1645

6, 8, 10, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33 and 35 are not so linked as to under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions pho1-13, pho3-21, pho2-15, pho3-18, pho3-33, pho3-3 pho3-17, pho2-2, pho1-5, pho3-1, pho3-23, pho3-50, pho1-14, pho2-10, pho3-14, pho3-24, pho3-29 or SEQ ID NO: 2, 4, 6, 8, 10, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33 and 35 represent structurally different polypeptides and the polynucleotides encoding them. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects. Thus, each sequence is unique and patentably distinct since each sequence/lab designated identifier has a different structure with specific amino acid or nucleic acid and is identified by a specific SEQ.ID.NO and thus lacks the same or corresponding special technical features. Applicant is required under Restriction is required under 35 U.S.C. 121 and 372 to elect a single disclosed lab designated identifier or SEQ.ID.NO from any group elected. If applicant elects a lab designated identifier "pho", then applicant should point out the particular (i.e., one) lab designated identifier "pho" that corresponds to SEQ. ID NO.

4. Applicant is required, in reply to this action, to elect a group and one lab designated identifier pho /pho or one SEQ.ID.NO and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
